

Fonant - hand-crafted websites

Contributed by fonant

Fonant is a small specialist web services company, based between Worthing and Brighton on the south coast of England. At Fonant we pride ourselves on our attention to detail.

A detailed knowledge and experience of PHP, XHTML, CSS, and MySQL allows us to create custom web sites for internet or intranet use. All sites are standards-compliant and compatible with all currently used web browsers.

We have our own dedicated Linux servers in London, and can provide web hosting with PHP/MySQL etc. at reasonable rates. We can also provide virus-scanned and spam-filtered e-mail accounts.

For further information, and to view our current portfolio, please visit www.fonant.com.

(If none of the above makes any sense at all, but you are still interested in having a website, please contact us for help and advice in plain English!)
